DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States
- 2. Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bayley.
- 3. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Perry.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 1, 2 and 5-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Seifert in view of Bayley. Seifert discloses the claimed invention except for the adjustable fastening means. Bayley teaches that it is known to provide a chimney top with adjustable fastening means as set forth at page 1, lines 63-75. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the flue liner of Seifert with adjustable fastening means, as taught by Bayley for its intended purpose.

Art Unit: 3749

6. Claims 8-11 rejected under 35 U.S.C. 103(a) as being unpatentable over Perry. Perry is silent as to the material the flue is made of; however, metals flue are conventional and for the flue of Perry to be metal would be obvious since the two well known flue material is either masonry or metal.

7. Claims 12-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Perry in view of Wilhite. Perry discloses the claimed invention except for the insulation. Wilhite teaches that it is known to provide a chimney attachment with insulation as set forth at column 2, lines 32-34. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the attachment of Perry with insulation, as taught by Wilhite for its intended purpose. The claimed different shapes of the corner is considered to be an obvious matter of design choice.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Harold Joyce whose telephone number is (703) 308-0274. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ira Lazarus can be reached on (703) 308-1935. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
